

Dear Committee Members,

I respectfully object to the changing to adding additional persons to make claims for the "Red Flag Law".

It is an unconstitutional law as it is, and adding more people to make claims, is only encouraging false, spiteful, or harassment claims being made. This type of determination needs to be made by medical qualified professionals.

The people most susceptible to being unable to protect themselves, will be the elderly, the poor, the minorities, the handicapped, and the single mom/working mom, in that they will not have the time, money, resources, to fight the baseless charges and clear their name.

You must consider the possibility of bad actors wanting to disarm someone they know or related to, for nefarious purposes.

John Kershaw
